UC Recruit is currently experiencing issues with uploading documents when using the Mozilla Firefox browser. Applicants or departmental users attempting to upload documents within the system typically experience no progress, a perpetual loading indicator, or a blank screen.

In order to properly upload materials, the suggested workaround is to use a different web browser, i.e. Google Chrome, Safari, Internet Explorer, or Microsoft Edge.

The UC Recruit programmers are actively investigating this issue and are working on a resolution. There is no estimated date/time of a resolution as yet. When a fix has been deployed, a notice will be sent out via this listserv.

Thank you for your patience and understanding.
